

APEX Science at a Glance

APEX Science brings a year of exciting hands-on science exploration to children in K-5 afterschool programs. Developed by the Miami Science Museum, with funding from the National Science Foundation, APEX Science also includes a training model for staff of local community-based organizations that provide afterschool care.

Each of the eight APEX Science Trainer's Guides includes four thematic lessons. Each lesson provides:

- Background Information for Activity Leaders
- Laminated Activity Leader's Guide
- Set of six laminated Children's Expedition Learning Cards
- Supplemental materials
- APEX Science CD

Professional development is key to the successful implementation of APEX Science. The fee-based APEX Science workshops prepare staff to make hands-on science an integral part of their afterschool program.
