

Frost Science Birthday Parties Food & Drink Guidelines

The onsite caterer at Frost Science is available to handle all of your birthday party food and beverage needs; alternatively, you can provide your own food and beverage for your event. (Please note that if you utilize the museum's caterer you cannot bring in additional outside food or beverage items.)

If you do choose to serve your own food and beverage at your event, please note the following guidelines:

- If you opt to have your food delivered (e.g. pizza) you will need to be available at the museum loading dock to accept the food delivery when it arrives. Museum staff cannot accept your delivery. (Please note that outside caterers may not prepare or deliver food for your event.)
- For the safety of all museum guests, food items must be stored and served at room temperature. Sterno heaters/open flame items, warmers, chaffing dishes, crock-pots, microwave ovens, etc. are not permitted.
- If you will be bringing items that need refrigeration (ice cream, ice cream cake, etc.), you will need to provide your own cooler and ice. The museum cannot provide any refrigeration or ice for your event. (Please also note that smash cakes are not permitted.)
- The museum cannot supply paper goods, tablecloths, utensils, cups or service items.
- Beer/wine/alcohol is strictly prohibited.
- For the safety of our animals, plastic straws and all balloons are prohibited.
- A \$75.00 clean up fee will be applied to all parties opting to bring in their own food and beverage.
