

FLOOR PLAN

Please note actual room layout may vary

Enlighten the senses of your guests with an unforgettable experience in one of the most advanced planetariums in the world. Your presentation, screening, product launch or lecture can become both a visual and educational experience in the Frost Planetarium, using its 16-million-color 8K visual system and crisp surround sound. Immerse up to 250 attendees in the action as the tilted screen, spanning 67 feet, fills the viewers' field of vision, and the permeating sound completes the excitement of this virtual journey. Enhance your screening with customizable laser light shows and a special soundtrack, or by adding your branding or company logo to a presentation. Complete the experience with appetizers, plated meals, or cocktails in the cozy but inviting Frost Planetarium pre-function space. Customizable screens and a canopy of stars surround this space, making it an ideal spot for a pre or post-function reception or seated dinner.
